**LOUIS BRUN, CEO OF SOLLUM TECHNOLOGIES
NOMINATED FOR CENTECH BOARD
DIRECTOR POSITION**

Montréal, Québec, Canada, February 2, 2022 – Many innovative companies, including [Sollum Technologies](#), have [Centech](#) to thank for their support as a leading tech incubator in Montréal. Now, Sollum's own CEO, [Louis Brun](#), who has successfully launched multiple companies over the years, is hoping to return the favour to promising startups thanks to his nomination to the Centech Board of Directors.

"Centech has a proven method of helping deeptech companies reach their greatest potential", said Brun, "I am proud to be able to lend my own expertise to this incubator so that budding entrepreneurs can find success like we have at Sollum™."

Centech, recently named "one of the most successful university incubators in the world" by UBI Global, offers a number of services for startups including their innovation hub called the [Collision Lab](#), expert coaching, workspaces, and access to pristine laboratories and equipment. They have two program streams, [Acceleration](#) and [Propulsion](#), the former which provides startups with support over 12 weeks and the latter which identifies the strongest businesses in the initial program and fosters them over a multi-year period.

"Louis and the rest of his team at Sollum Technologies exemplify the kind of innovation and business acumen that we look for and encourage in startups" said [Richard Chénier](#), CEO of Centech, "I am very excited for him to join us."

About Centech

Founded in 1996 by the École de technologie supérieure and located in the heart of Montreal's Innovation District, Centech is a start-up incubator dedicated to technology objects and other advanced technologies with high growth potential. Through its Acceleration and Propulsion programs, Centech acts as a true instrument of growth, creating one of the most important concentrations of high-level technological entrepreneurs in Quebec and Canada.

About Sollum Technologies

Inspired by nature, Sollum Technologies was founded in 2015 to offer greenhouse growers the only smart LED lighting solution which dynamically recreates, perfects, and modulates the full spectrum of the Sun's natural light. The company is based in Montréal (Québec, Canada), where its design, development, and manufacturing activities are concentrated. Sollum™ works closely with its clients and research centers to create recipes that are adapted to the growth cycle of each crop, regardless of its native climate or the location of the greenhouse. Its SUN as a Service® cloud platform enables multi-zone light management so growers can implement several different recipes simultaneously in the same greenhouse. The platform also automatically adapts the lighting of each zone to the ambient light to match recipe targets. Sollum's award-winning lighting solution thereby provides unparalleled value in terms of energy savings, productivity, and superior produce quality through a flexible, adaptive, and easy-to-use application, with great respect for the environment.
